EDUCATION

University of California, Berkeley | Computer Science | May 2029 | Berkeley, CA

EXPERIENCE

InfoFlow — Berkeley, CA March 2026 - Present

Founding Engineer

- Architected and built core features of an AI-assisted student-success platform, enabling counselors to identify at-risk students, track graduation readiness, and coordinate interventions.
- Built the full stack with Next.js, TypeScript, Supabase, and PostgreSQL, implementing Microsoft SSO, role-based access control, and privacy-first AI features designed around FERPA-sensitive student data.
- Shipped to production, owning product, UX, and infrastructure decisions alongside a small engineering team, now in pilot negotiations with 3 districts totaling 30K+ students.

Latino Business Student Association — Berkeley, CA September 2026 - Present

Information Technology Intern

- Lead the redesign of the alumni directory on LBSA's Squarespace site, using custom code to structure profiles with LinkedIn, employment, and contact info, making alumni more accessible and increasing mentorship opportunities.
- Present workshops to 30+ students on building AI agents to automate repetitive tasks, helping members save time on academic and organizational workflows.

UC Berkeley Haas Technology Solutions — Berkeley, CA April 2026 - Present

Student Consultant

- Resolved 40+ technical support requests across walk-ins, tickets, and Zoom appointments, troubleshooting software and hardware issues for Haas students and faculty across Microsoft Office, Adobe Creative Cloud, Google Workspace, printers, and campus WiFi.
- Triaged incoming requests to resolve in-scope issues directly or route them to the right department with contact info and next steps, while managing loans, extensions, and returns of laptops, cameras, microphones, and more for students and faculty.

America On Tech — *Los Angeles, CA Summer 2023 - May 2025*

Web Development & UX/UI Programs

- Built responsive, user-centered web interfaces across two programs, applying modern layout designs and styling practices using HTML, CSS, JavaScript, and Bootstrap.
- Integrated third-party APIs to dynamically fetch and display content, adding interactive functionality to multipage web applications.
- Designed low, mid, and high fidelity prototypes in Figma to plan layouts and communicate design decisions before development, streamlining builds under tight deadlines.

PROJECTS

Shot Planner – 3D Previsualization Tool – GitHub | Live Demo – HTML, CSS, JavaScript, Three.js

- Architected a browser-based 3D previsualization tool for film and animation, with placeable actors, props, cameras, lights, walls, and movement paths.
- Built synchronized 2D and 3D editors with a live camera preview, supporting lens presets, FOV, camera height, and tilt.
- Engineered scene management with multi-select, duplication, object notes, and JSON import/export for persistent layouts.
- Implemented undo/redo with state snapshots and a time of day lighting system that updates sky color, sun position, and ambient light in real time.

SKILLS & COURSEWORK

Languages: Python, JavaScript, Java, TypeScript, HTML, CSS, SQL, Scheme
Frameworks & Tools: Next.js, Supabase, PostgreSQL, Three.js, Canvas API, Git, Figma
Coursework: Data Structures & Algorithms, Structure and Interpretation of Computer Programs
